About

I graduated in 2000 with a degree in Graphic Design. While in school I fell in love with creating and computers which led me to design and create websites. It's important for me to be original, challenge myself and look forward in everything that I do. I want to work with a team that shares the same passion for web development that I do and if they don't they will after they meet me.

Work

Comcast

2015-01-01 – 2015-07-01

Software Engineer

I was brought as a contractor to create a part auditing application to be used by Comcast Sites and Depots to keep track and audit their inventory

Highlights

- Audit application with AngularJS and AngularUI on the frontend with NodeJS and Express on the backend
- Development with daily scrums, code reviews, github for VCS, Jira for Sprint and bug tracking

Acurian

2014-06-01 – 2014-12-01

Mobile Consultant

Responsible for creating the frontend for an SPA that screens potential clients for clinical trials

Highlights

- Creation of rapid prototypes that are responsive
- Developed the application with a mobile first approach

National Board of Medical Examiners

2013-06-01 – 2014-06-01

UX Engineer

Consultant for an application that administers medical examination

Highlights

- Implementation of the AngularJS MVC framework for application conversion into the Chromium frame
- AngularUI with Bootstrap for the design framework
- Use modern web app technologies such as HTML5, CSS3 and JavaScript
- Accessibility features for users with low vision
- Created with an agile team
- A/B & User testing
- Support for QA team via JIRA
- Advocate of TDD with Protractor, Karma & Jasmine

Bristol-Myers Squibb

2010-01-01 – 2013-04-01

Senior Web Developer

Day to day operations consisted of anything from bug fixes, Sharepoint themes, iOS apps using web based technologies, mobile, etc.

Highlights

- Daily use of CSS3, HTML5 & JavaScript to create websites and web apps
- Creation of mobile websites using jQuerymobile and Sencha frameworks
- Responsive development for internal presentations
- Customization of Sharepoint 2007 & 2010 websites
- Taught classes on web development on HTML5 and JavaScript
- Development of frontend architecture and standards to be used by entire team
- Worked on HTML5 video delivery strategy for multiple devices
- Use of ajax to process xml and json data

Merrill Lynch

2010-07-01 – 2010-11-01

Web Designer II

Contract work for development of the Merrill Lynch Institutional Retirement website

Highlights

- Execution of Marketing initiatives for multiple businesses
- Information Architecture for CMS driven websites

- Development of CMS driven website
